## **WELCOME..**

Ace Crane Systems, an innovative and progressive overhead crane and hoist manufacturing company, based in the United Arab Emirates. We are able to offer a complete service from design concept through to final commissioning and beyond. With over 30 years worldwide experience in the field of cranes and materials handling equipment, it is our intention to source and provide the right products based on the specific applications and the purpose of the cranes. Ace Crane Systems provide solutions from several leading equipment manufacturers from Europe.

Our sales team can technically assist engineers and designers during the initial project design stage to determine the key parameters of the plant layouts and building in terms of material handling and flow of goods. The selection of the correct material handling equipment can provide cost savings in production operations and optimized building dimensions can show substantial savings on the overall project costs. The electro-mechanical components are manufactured by our overseas principals, whilst our own company, Ace Group Fzc, located at Hamriyah Free Zone, Sharjah, fabricates the crane girders and structures based on our principals designs.

# COMPANY INTRODUCTION

Ace Crane Systems LLC, an ISO 9001 company, is a leading, professionally managed, & continuously growing crane and lifting equipment supplying company based in the United Arab Emirates with clientele spread around Middle East region.

With our expert team in the field of cranes and lifting equipment, it is our intention to provide the right products based on the client specific applications & the purpose of the cranes, not only from one single source, but various specialist equipment manufacturers in Europe.

Our sales team can technically assist the consulting engineers during design stage to decide on the key parameters of the production layouts and building in terms of material handling and flow of goods. The selection of the correct material handling equipments can provide a cost saving to your operations and also building

dimensions can be optimized to show substantial savings on the initial project costs. The electro-mechanical crane components are imported from Abus, Germany. The crane structures are manufactured at our facility, based in Hamriyah Free Zone as per Abus Germany design. Our production facilities with more than 130 employees working exclusively in crane girder fabrication, assembly, Rail & Crane installations and after sales service. All crane girders are Grit blasted to SA 2.5 and a 3-coat epoxy painting system is applied as standard. Special painting systems can be offered if required.

The cranes are assembled and shop tested, witnessed by the Client/Consultant prior to dispatch thus avoiding prolonged site works. The crane erection, installation and the commissioning is carried out by our team of technicians. Our service division has experienced crane engineers and suitably qualified technicians, who understand the need for quality and safety requirements of contracts for high profile clients like DUBAL, DUCAB, DEWA, Ministry of Defense and many other Clients like yourselves.

We can provide a rapid and effective after sales service and also preventative maintenance contracts for older existing cranes, thus keeping the breakdown time for the crane to the minimal.

We can offer the modernizations of cranes including the provision of stepless controls on any motion of the crane using VFD (frequency inverters) and thyristor control. We also specialize in the supply of PLC operating systems for semi automation of crane operation.

**“We are what we repeatedly do.  
Excellence, therefore, is not an act but a  
habit”**

**-Aristotle**

ACE ENGINEERING LLC

ACE CRANE SYSTEMS LLC

Every success story has humble beginnings, ours, is the same. Our founder and CEO embarked on this journey, with years of experience in the lifting solutions business and a bag full of dreams. Confidence in himself and a never say die attitude served him well. Having earned the goodwill and loyalty of many customers, through his professional, honest and non compromising approach, in the years of working in this field, he was able to establish ACE Cranes Systems LLC.

From a team of 5 members in 2002, today we are at a staff strength of 450 and growing. From a one room office, from where our Founder embarked on this journey, today, we have a total of 100,000 plus square meter area we collectively operate from. Our Head Office is situated inside Hamriya Free Zone, Sharjah, and currently we are a group of companies.

As a company with sound leadership our CEO believes that "The growth and development of people is the highest calling of leadership", keeping in line with this thought, many of our staff are fresh young graduates, whom our CEO chooses to recruit, train and be personally involved in imparting knowledge, converting them into successful, smart engineers and mature and responsible human beings. Those who have continued their journey, passing through ACE Group, have success stories of their own, a tell tale sign and testament of imparting/ giving back to the world, the knowledge our CEO has acquired

## ACE DISTRIBUTORS

Qatar - United Equipment Group/ Servtech International.

KSA - Ace Cranes & Engineering Saudi- Power Lift Co. for  
Industrial Service & Trading and Contracting.

Bahrain – Hydrapro Trading & Services Co. WLL

Kuwait - Crown International

Oman – Mohsin Haider Darwish LLC

## OUR PRODUCTS & SERVICES

Electric Overhead Traveling (EOT) Cranes- Single & Double girder design. Manual overhead travelling cranes, Lifting davits and Lifting tripods

Goliath (Portal) & Semi Goliath Cranes

Special Purpose Cranes.

Crane Rails and Long travel beams – Design, supply and installation

Jib cranes – Pillar or Wall mounted, up to 360 degree slewing

Monorail hoists –  
Electric wire rope,  
Electric Chain hoists

Radio remote Control  
Systems.

Lifting magnets for  
Customized handling  
and Grabs

Power conductor  
systems, Flat cable  
Festoon Systems  
and Cable reels

Supply & Install of  
crane rail systems

PALMLINK®  
Specialized industrial  
safety gear

# OUR SERVICES

- Building Layout to optimize productivity
- Technical Consultation for material handling /storing solutions
- Technical data while designing the buildings with cranes
- Method Statements for shop testing, Site testing and Crane Erection
- Cranes assembly, Fixed wiring and Shop testing
- Crane Transportation, Site Erection, installation and Commissioning
- Implementation of Radio remote Control Systems & Tandem Controls
- Replacement and Repair of heavy duty Crane profile Rails
- Thermit welding and Puddle Arc welding techniques for Rail Joints.
- Back up services and supply of spare parts for reputed Crane makes
- Refurbishment and modernization of old cranes
- Inspection and repair of ship mounted Derrick cranes, Winches etc.
- Maintenance, Repair and Servicing of cranes by experienced technicians
- Provision of annual maintenance contracts for cranes

handling systems

## OUR FACILITY

Our manufacturing facility is located in Hamriyah Freezone - Sharjah over **11,000 sq.mtr. of total area with 1750 sq.mtr.** covered area and 265 sq.mtr. office space.

We are equipped with all necessary fabrication machineries like universal iron worker, radial drilling machines, various types of welding machines, cutting machines besides all types fabrication tools. We have on board qualified and experienced team of personnel in various departments who are fully geared to implement various types of projects. Besides, we have tie ups with professional designing / drafting company to meet your engineering and design requirements.

Along with **building overhead cranes**, we can also offer the following activities:

- Structural Steel Works
- Stainless Steel Works
- Surface Treatment
- Machine Shop
- Refinery and Petrochemical Equipment
- Electromechanical equipment's
