

## TRUCK COOLER FAN

**GANDHI**  
Automations Pvt Ltd

India's **No.1** Entrance Automation & Loading Bay Equipment Company

# Truck Cooler Fan with LED Loading Dock Light

Not only increase safety and productivity but also make the workers more comfortable by controlling temperature inside a trailer.

Built to improve airflow and illuminate a variety of applications, the Dock Light is a premium solution for loading docks, production facilities, auto shops, machine rooms, and even railcar loading platforms.

## **Rugged and Compact Housing**

The light head's polycarbonate housing resists impact damage from forklifts or in-coming trailers, lowering maintenance costs and minimizing the risk of downtime or interruptions in the cargo handling process.

## **Continuous Quality Light**

The LED light's intensity exceeds a 600-watt incandescent bulb, but uses only 100 watts to emit a cool white light. The constant-current IP66 LED driver is rated for 100,000 hours of operation at 77° F.

## **Improve lighting and ventilation at the loading dock**

The LED Dock Light Fan provides a safe and comfortable working environment for dock personnel.

## **Powerful Ventilation and Cooling Solution**

The heavy-duty, three-speed fan can move over 2800 CFM of air per minute, keeping the loading bay personnel cool on hot summer days.

## **Rugged Flexibility**

The Dock Light Fan can be easily mounted in a convenient location. The durable design and construction ensure product longevity and reduce maintenance costs. Available arm lengths are 56" (1425mm).

## Build Your Lighting Solution

Enhance fan performance with a lamp head assembly, and shine light anywhere it's needed. Lamp head choices include metal, 5 Beam Angle Optical System, and bracket and 100W led Light

## Optional Motion Sensing Technology Automatic Light ON/OFF

The motion sensor senses when a forklift or person is leaving a trailer and auto-matically dims the light to 25% output, restoring to full power after a few seconds.

## Technical Drawing

## LED Light

Power	Light Source	CRI	CCT	Beam Angle	Light Flux	Light Adjust Angle	Motion Sensing Technology
100 Watt	Bridgelux	80+	5000K	10/25/45/70/95	180,000lm	360 degree	Variable auto-off timer up to 180 minutes

## Fan

Power	Voltage	Speed
900 Watt	230 volt/50Hz	2000/2600/2800 CFM
