Seamless PDF  
Development Experience  
Across all platforms

# SOLUTIONS MICR

## Dedicated Solutions To Secure Government, Financial, And Business Documents

Manage fraud, reduce operational risk, and meet compliance with check, prescription, and document security solutions to protect printed information at the point of issue. Create a secure printed document with TROY's combination of software, hardware, and consumables. Specialty inks and toners, security software, and customized hardware gives you the tools to add personalized, on demand, layered security to your printed documents.

TROY solutions have been delivering trust, security, and reliability since 1963.

### The World's Most Secure MICR Printers.

We Always start with an HP Office Printer, The world's Most Secure Printers. We then enhance the HP printers with additional features specifically for check printing. Combining HP's features, plus TROY's additional features creates The World's Most Secure MICR Printers.

### All of the HP Printer Features with 15+ TROY MICR Security features added.

#### Toner Sensing

- Detects presence of MICR toner and prevents printing of MICR or other specified features.

#### MICR Fonts

- Security fonts designed to be printer specific. Included fonts vary based on printer model.

#### MICR Toner Secure

- Fraud resistant MICR toner included with every MICR Printer.

#### Paper Tray Locks

- Physical locks protect from fraud by refusing unauthorized access to resources.

#### TROY ExPT (Exact Positioning Technology)

- Precise positioning of both the MICR line or the entire check image.

## TROY Security Inks & Toners

Patented Security Inks and Toners add a hidden layer of security to your high value documents. Make authentication easy and counterfeiting difficult by adding overt and covert layers of security that fluoresces blue with the correct UV verification light.

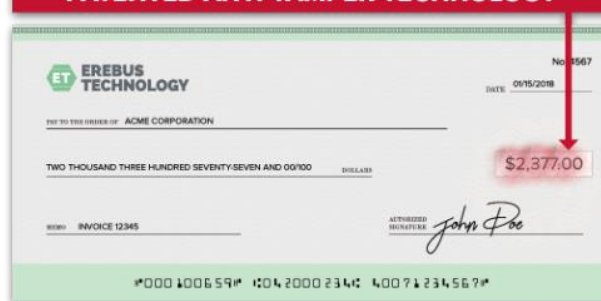

## Vital Records

Easily protect birth, marriage, and death certificates with confidence. Countermeasures must be put in place to prevent document fraud, a growing epidemic. It's up to you to keep constituents protected, including their identities. This starts with protecting their vital records, such as birth, marriage, and death certificates. This solution, available only to government entities, is simple yet highly effective. You can lock down the printer, the printer trays, and add anti-tamper features to each printed vital record to help prevent fraud.

## PATENTED ANTI-TAMPER TECHNOLOGY

## Access & Time Management Systems

- RFID Systems
- Biometric Systems
- Guard Patrol Monitoring Systems
- Time Attendance Software
- Electronic Locks

## CCTV & Surveillance Cameras

- Comprehensive range of IP Network Cameras from 2MP to 12MP and special application cameras like thermal, fish eye lens, multi lens and PTZ's
- Analogue AHD Cameras in 2MP and 5MP
- Sea Farming security
